UDIT KISHOR

FULL-STACK DEVELOPER

+91 8789213238 | uditkishor95@gmail.com | Sector 66, Noida, UP, 201301

CAREER SUMMARY

As a passionate Full-Stack Developer with extensive experience in the MERN stack, I am eager to lead and collaborate with a dynamic team. My background in backend development, coupled with a strong commitment to delivering high-quality solutions, positions me as an ideal candidate for your projects. I thrive in challenging environments and am excited about the opportunity to contribute my skills and drive to your innovative team, ensuring we achieve remarkable results together.

WORK EXPERIENCE

Full-Stack Developer (Team Lead) | Andgate Informatics Pvt. Ltd, Noida, India   Feb 2024 - Present

- Lead end-to-end development of full-stack web applications, overseeing the architecture of internal software tools and client-facing platforms.
- Architected and deployed secure, scalable RESTful APIs on AWS and MongoDB Atlas, improving system reliability and data accessibility.
- Managed a cross-functional team to ensure seamless integration between frontend and backend services, while mentoring junior developers to maintain high code quality.
- Collaborated with US-based partner Benekiva to reconstruct insurance admin platforms, significantly enhancing performance and responsive design for global client requirements.

MERN Stack Developer | ItaxEasy Pvt. Ltd, Noida, India   Jul 2023 – Dec 2023

- Developed high-performance RESTful APIs using Node.js and Express.js to power financial service modules.
- Engineered specialized fintech tools, including ITR filing, TDS & GST calculators, and comprehensive CRM systems.
- Optimized MongoDB database queries and data aggregation pipelines to reduce latency and improve application response times.
- Synchronized frontend and backend functionalities to ensure a smooth, bug-free user experience across all modules.

Backend Developer (Contract) | Tender Truck Pvt Ltd, Remote   Feb 2023 – Jun 2023

- Built the backend architecture for an Online Fleet Booking System, ensuring high availability and secure data handling.
- Developed a real-time delivery tracking system from wireframes, utilizing Node.js to provide live updates to users.
- Integrated third-party APIs and managed complex data structures to streamline the logistics workflow.

Backend Developer | Shorea Softech Pvt. Ltd, Okhla Phase III, New Delhi   July 2022 – Nov 2022

- Developed complex backend logic for monthly performance reporting, automating manual data collection processes.
- Created a custom incentive system for sales teams using Node.js and MongoDB, increasing transparency in performance tracking.
- Delivered secure and robust APIs for multiple internal products and external client deliverables.
